Subject: Report For Additional Investigation in Support of Prescriptive PCB Remediation at Solid Waste Management Unit (SWMU) 17 - PCB Capacitor Burial/Pole Yard Naval Support Activity (NSA) Crane, Indiana – Draft

Dear Mr. Hickey:

The enclosed report summarizes sampling and analysis activities and associated data for SWMU 17, with an emphasis on activities completed between April 2012 and the current date. This report, which began as a letter report, was expanded to include all available data for SWMU 17, including photographs taken within the past two weeks. To limit the page count of the hardcopy, the enclosed hardcopy report includes only the text and the most important data tables and figures required to understand the extent of PCB contamination at SMWU 17. The accompanying compact disk (CD) contains this same information plus additional data tables and appendices that include field task modification requests, field notes, and numerous site photographs. On this CD, the report comprises a single pdf file and one additional folder containing the most recently captured site photographs.

Should you have any questions, please contact me (412-921-8615, [tom.johnston@tetrattech.com](mailto:tom.johnston@tetrattech.com)) or Ralph Basinski (412-921-8308, [ralph.basinski@tetrattech.com](mailto:ralph.basinski@tetrattech.com)).

Sincerely,

Tom Johnston, PhD  
Project Manager
